Preface	7
1. Objectives of the Forsandmoen project	9
2. The investigations at Forsandmoen	11
2.1 Previous investigation of prehistoric houses in Rogaland and Scandinavia	11
2.2 Landscape	12
2.3 Ancient monuments in the area	15
2.4 Artefacts from the Forsand area	17
2.5 Research strategies and progress of the excavation.....	20
2.6 Summary of excavation progress 1981–90	20
2.7 Further settlement excavations 1992–95, 2007.....	22
2.8 Excavations of burial mounds and cairns 1980–2001	22
3. Methods and source criticism	25
3.1 Conditions for preservation of the settlement site	25
3.2 Excavation by mechanical topsoil stripping	26
3.3 Phosphate analysis	27
3.4 Macrofossil analysis	29
3.5 Pollen analysis	31
3.6 Radiocarbon analysis	40
3.7 Finds from the Forsand project	43
3.8 The houses	48
4. Types 1 and 2: Dwelling houses with wide-spaced trestles	51
4.1 The distribution of type 1–2 houses and their orientation	51
4.2 Analysis of house features	52
4.3 Find distribution	56
4.4 Comparative houses from Norway and Denmark	57
5. Type 3: Dwelling/byre house with opposed, recessed entrances at the middle of the house	59
5.1 The distribution of type 3 houses and their orientation	60
5.2 Analysis of house features	61
5.3 Comparative houses from Norway	76
5.4 Comparison between Forsand and the Norwegian type 3 houses	79
5.5 Comparative houses from southern Scandinavia, Germany and the Netherlands	79
6. Small dwelling houses	95
6.1 Type 5: Small dwelling house with a central wide-spanned trestle	95
6.2 Type 6: Small dwelling house with a circular hearth with a clay foundation	98
6.3 Conclusion type 5 and type 6	99
6.4 Type 11: Small dwelling house with a hearth and diverging trestles	99
6.5 Comparison and interpretation of the house types 5, 6 and 11	101
6.6 Type 12: Small U-shaped features/buildings	103
7. Storage buildings (granaries)	105
7.1 Type 18: Four-post buildings	105
7.2 Type 13: Four-post buildings with a trapezoid layout	125
7.3 Type 14: Buildings with four to five diverging trestles	126
7.4 Types 15–16: Six- to twelve-post storage buildings	127
7.5 Concluding remarks	134

8. Type 7: Large dwelling/byre houses with a central wide-spanned trestle	135
8.1 The features of type 7 houses	138
8.2 Finds	142
8.3 Distribution in space and time	142
8.4 The origin of type 7	143
8.5 The idea behind type 7 houses	144
8.6 Comparative houses	144
9. Type 8: Large dwelling and byre house with a dwelling area in the centre of the house	147
9.1 The features of the house type	147
10. Type 9: Large dwelling/byre house with opposed recessed entrances at either end	153
10.1 The features of type 9 houses	153
10.2 Orientation and length of the post-setting	153
10.3 Shape and size of roof-bearing and entrance postholes	173
10.4 Comparison between Roman Iron Age and Migration Period type 9 houses	174
10.5 Comparative houses from Rogaland, Norway and the Nordic region	175
10.6 Comparative houses in the Nordic region	182
11. Type 10: Workshop and/or dwelling house as an additional house to type 7, 8 and 9	185
11.1 The characteristics of type 10 houses	185
11.2 Structure of the houses and distribution of the finds	190
11.3 Comparison between Forsand and the Nordic region	191
12. Type 17: Small rectangular workshop	193
13. The life expectancy of houses	195
13.1 The life expectancy of post-built houses	195
13.2 The life expectancy of type 3 and type 9 houses at Forsand	196
13.3 Eleven radiocarbon dated house sequences	199
14. Interpretation of activity areas in combined dwelling and byre houses	207
14.1 Location of the dwelling section in type 3 houses	207
14.2 Location of the dwelling section in type 9 houses	214
15. The byre in house types 3 and 9	221
15.1 The byre in type 3 houses	221
15.2 The byre in type 9 houses	229
16. Settlement synthesis	235
16.1 Introduction to the development of the settlement	235
16.2 The Bronze Age	236
16.3 The Pre-Roman Iron Age	249
16.4 Roman Iron Age AD 1–350	253
16.5 The Migration Period (AD 350–560/570)	268
16.6 The Merovingian Period	276
16.7 Summary of the development of the settlement from 1400 BC to AD 700	277
17. The abandonment of the Forsandmoen settlements and the Fimbulwinter in AD 536–37	283
17.1 The difficulty of uncovering the real period of use	283
17.2 Did a volcanic eruption cause the Fimbulwinter?	285
17.3 The effects of volcanic eruptions on society	286
17.4 Can the volume of ¹⁴ C dates reveal if the decline of Forsandmoen is related to the AD 536 eruption?	288
